

P6: Paper Prototyping

Team: RSOs

HCDE 318

Project Description:

For our project, we decided to make an application for the UW RSOs (registered student organizations) and students at UW. We found that there was a lack of communication between student clubs and their audience. Our app, CIRCLES will help students find RSOs they could be interested in as well as help clubs and organizations with outreach for events and recruitment.

Overview:

Task 1: Finding the Location of an Event

In this scenario, the user is attempting to find the location of an upcoming event hosted by an RSO they already know of. In this scenario, specifically, they want to find the location of an upcoming event from the *Breakfast Club* called *Bagels and Coffee*.

Task 2: Subscribing to RSO Notifications and Updates through an Event

In this scenario, the user wants to subscribe to notifications (push notifications) for upcoming events and updates that an RSO they follow may post. Specifically, the user has just gone to an event called Bagels and Coffee hosted by the Breakfast Club and wants to subscribe to future events from them.

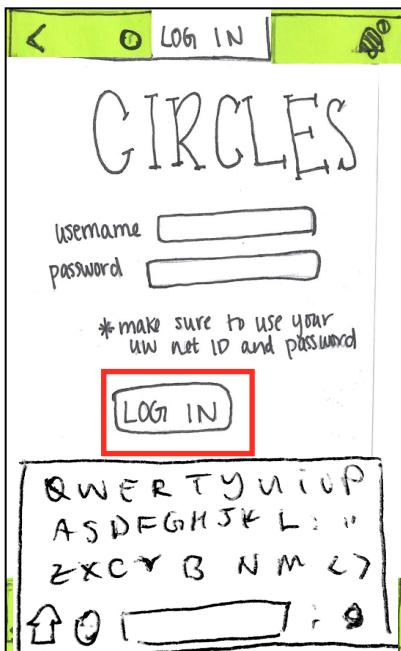

Task 3: Editing the Description of a Specific RSO Page

As an RSO administrator/leader, the user wants to edit the description for their RSO. Specifically, a leader of the Husky Ski Club wants to change their description to be more up-to-date.

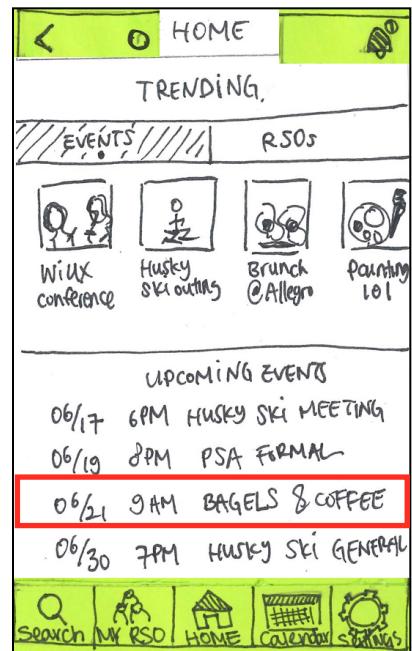

Additional Task: Editing Your Personal Interests

User would like to edit their interests which will change the RSOs that will be recommended for them when they search for new RSOs to be a part of. Specifically, the user wants to be recommended more Basketball-associated RSOs by adding "Basketball" to their interests.

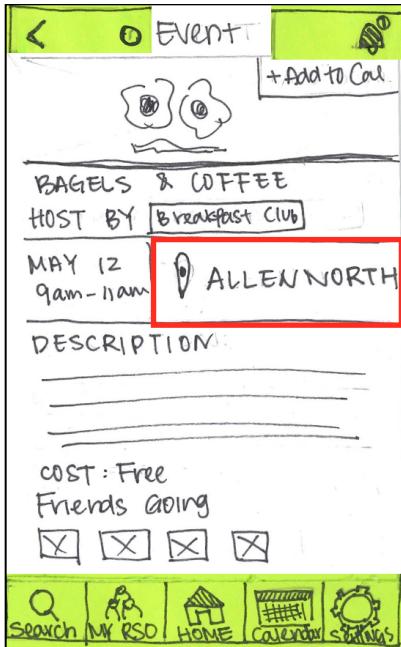

Task 1: Finding the Location of an Event

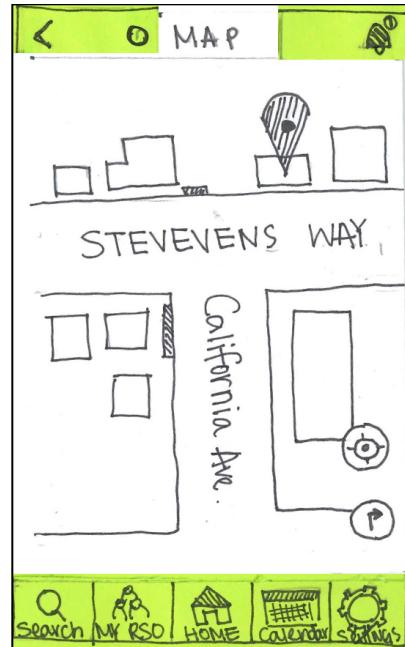

1. User logs into Circles using their UW NetID.

2. User is shown the home page which contains trending and upcoming events. User clicks on the event *Bagels and Coffee*.

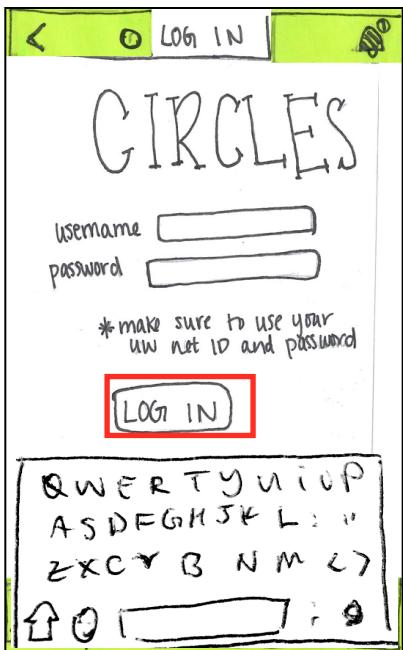

3. User is taken to the event page with details pertaining to the event, including location, host, cost, descriptions, and title. User clicks on the provided location information (*Allen North*)

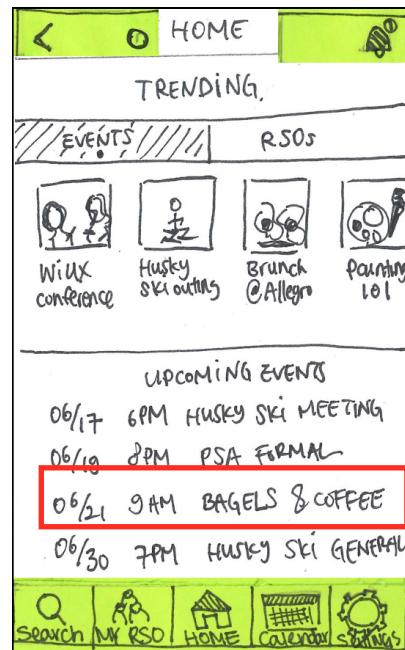

4. User is linked to Google Maps, which will directions and other transit information.

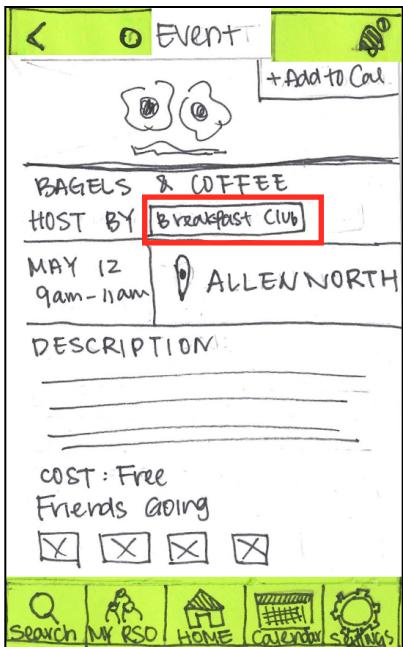

Task 2: Subscribing to RSO Notifications and Updates

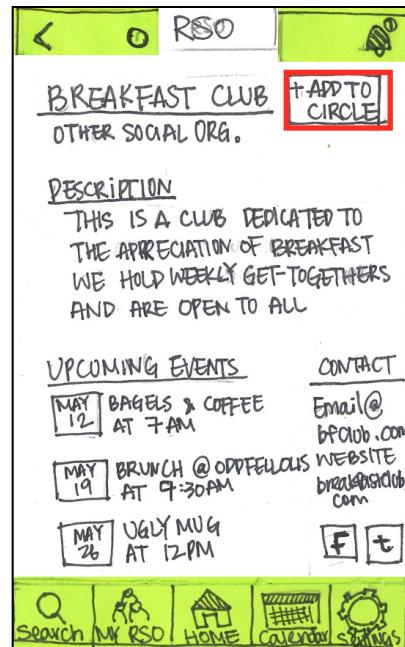

1. User logs into Circles using their UW NetID.

2. User is shown the home page which contains trending and upcoming events. User clicks on the event *Bagels and Coffee*.

3. User is taken to the event page with details pertaining to the event, including location, host, cost, descriptions, and title. User clicks on the host's name. (*Breakfast Club*)

4. User is taken to the RSO page of the Breakfast Club. Here they click the "Add to Circles" button to subscribe to their future events.

Task 2: Subscribing to RSO Notifications and Updates (continued)

Left Prototype (After Adding to Circle):

- BREAKFAST CLUB** OTHER SOCIAL ORG.
- DESCRIPTION**: THIS IS A CLUB DEDICATED TO BREAKFAST TOGETHERS. WE + AND YOU HAVE ADDED THE BREAKFAST CLUB TO YOUR CIRCLE.
- UPCOMING EVENTS**:
 - MAY 12 BAGELS & COFFEE AT 7 AM
 - MAY 19 BRUNCH @ ODDFELLOWS WEBSITE AT 9:30 AM
 - MAY 26 UGLY MUG AT 12 PM
- CONTACT**: Email@bfpclub.com
- SOCIAL MEDIA**: F T
- NAVIGATION**: Search, My RSO, Home, Calendar, Settings

A red box highlights the "DONE" message in the description area.

Right Prototype (In My Circles):

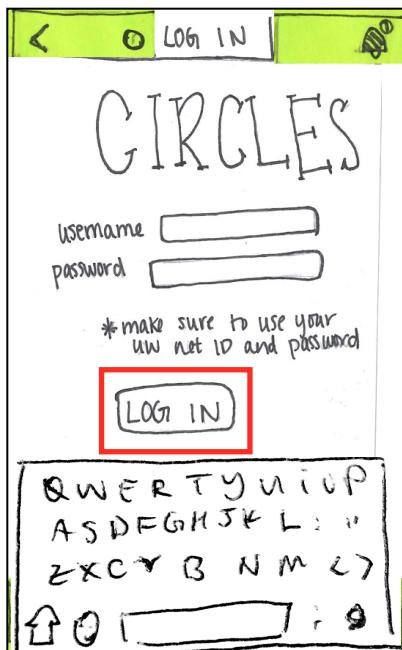

- BREAKFAST CLUB** OTHER SOCIAL ORG.
- DESCRIPTION**: THIS IS A CLUB DEDICATED TO THE APPRECIATION OF BREAKFAST. WE HOLD WEEKLY GET-TOGETHERS AND ARE OPEN TO ALL.
- UPCOMING EVENTS**:
 - MAY 12 BAGELS & COFFEE AT 7 AM
 - MAY 19 BRUNCH @ ODDFELLOWS WEBSITE AT 9:30 AM
 - MAY 26 UGLY MUG AT 12 PM
- CONTACT**: Email@bfpclub.com
- SOCIAL MEDIA**: F T
- NAVIGATION**: Search, My RSO, Home, Calendar, Settings

The "ADD TO CIRCLE" button has been updated to "IN MY CIRCLES".

5. A pop-up shows up to confirm that the user has added the RSO to their "Circles" and that they are now following them.

6. The "Add to Circle" button is updated to an "In my Circles" button to confirm to the user that they are following this RSO whenever they open the *Breakfast Club* RSO Page.

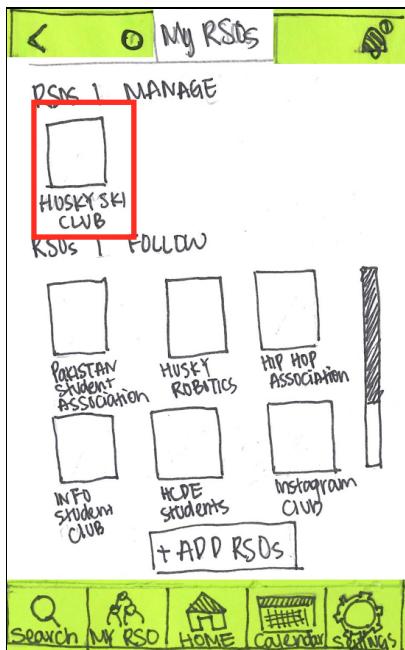

Task 3: Editing the Description of a Specific RSO Page

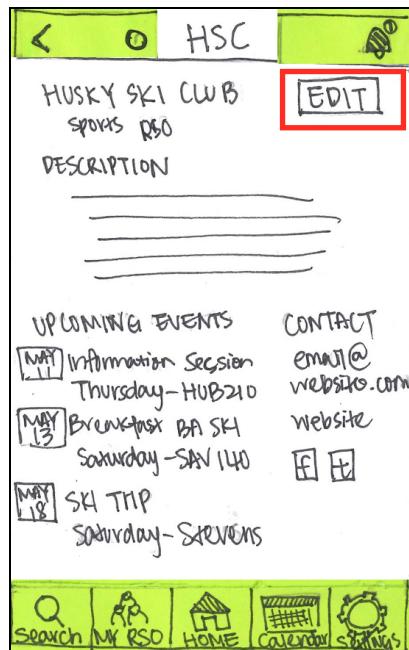

1. A RSO Leader logs into Circles using their UW NetID.

2. User is shown the home page which contains trending and upcoming events. User clicks on the menu item *My RSOs*

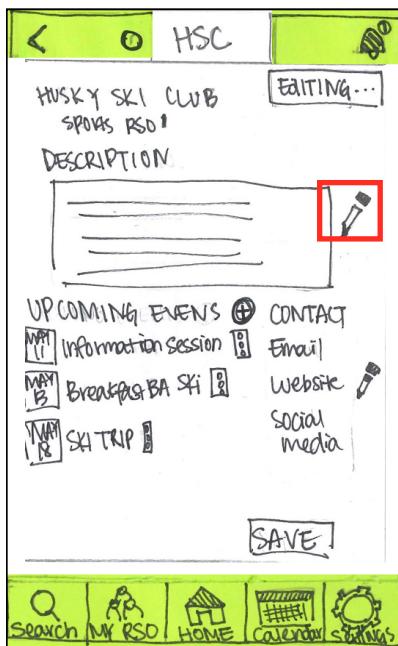

3. User is taken to the My RSOs page where they will find a list of RSOs they manage and the RSOs they follow. User clicks the RSO they manage, *Husky Ski Club*.

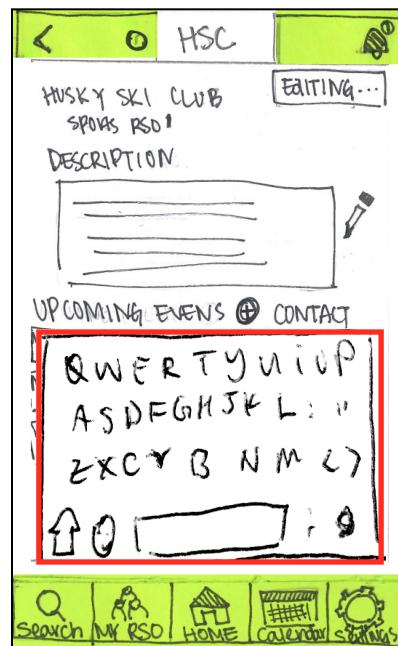

4. User is taken to the editable (since they are an administrator of this specific RSO) page. User clicks on *Edit*.

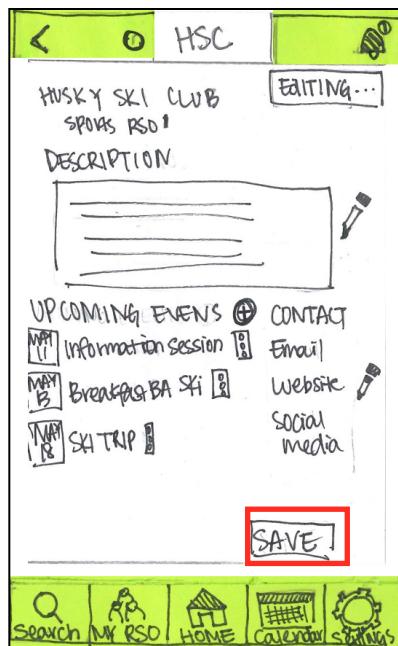

Task 3: Editing the Description of a Specific RSO Page (continued)

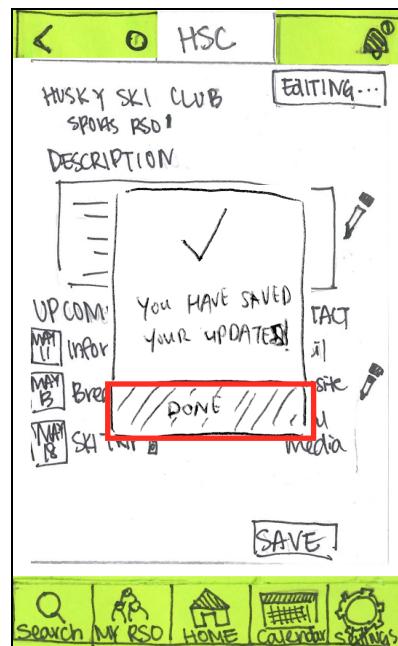

5. User toggles the ability to Edit. Since the user wants to edit the description, they click the "pencil" icon for editing text fields.

6. User is able to edit the description. A keyboard is toggled on automatically to allow the user to edit.

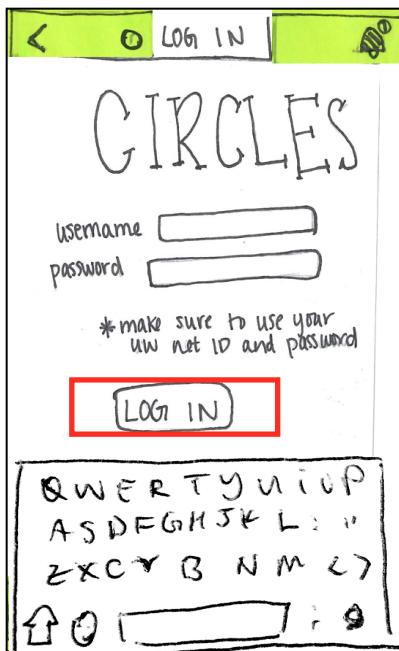

7. Once the user is done editing, they click Save.

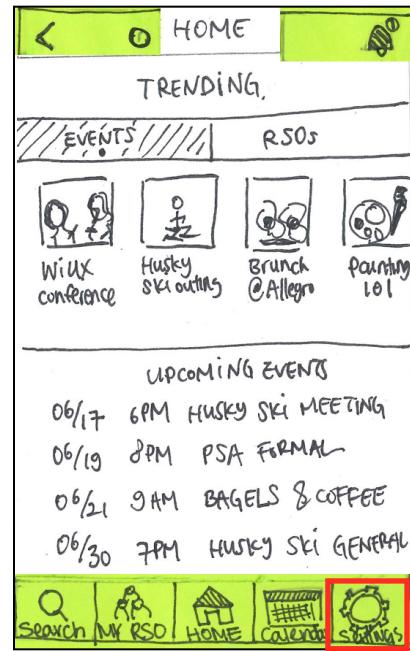

8. A pop-up shows up to confirm that the user has updated the RSO description. It returns to the RSO page.

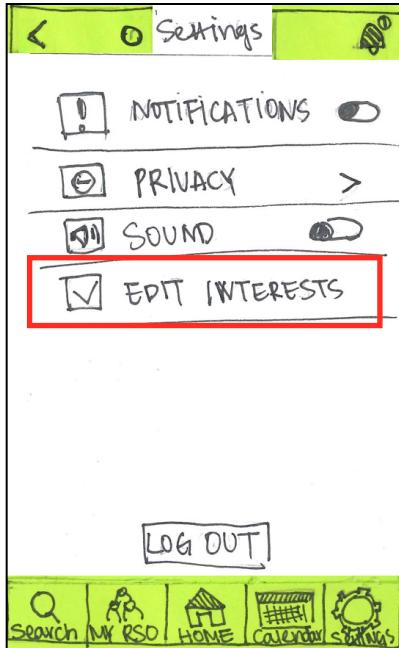

Additional Task: Editing Your Personal Interests

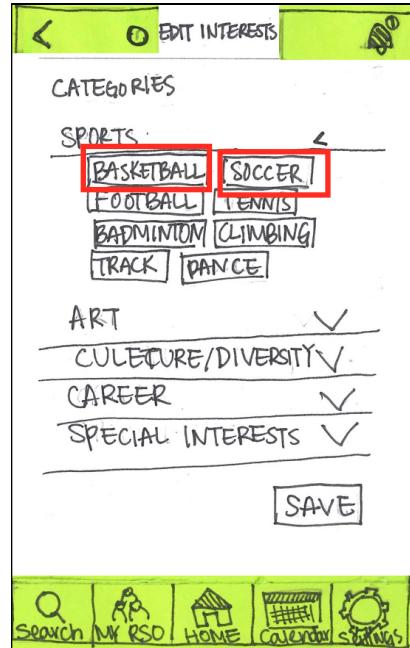

1. A user logs into Circles using their UW NetID.

2. User is shown the home page which contains trending and upcoming events. User clicks on the menu item *Settings*.

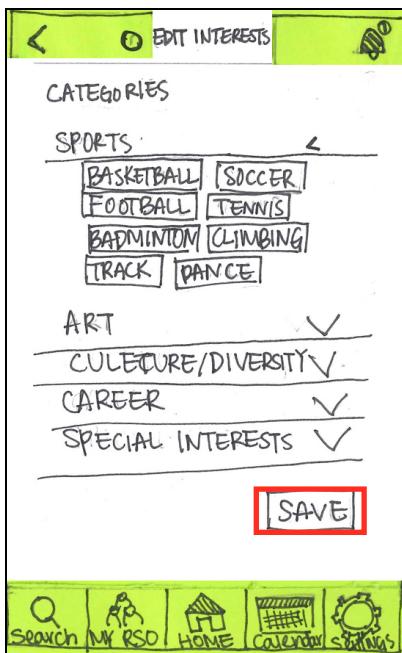

3. A number of settings show up. The user chooses to edit their interests.

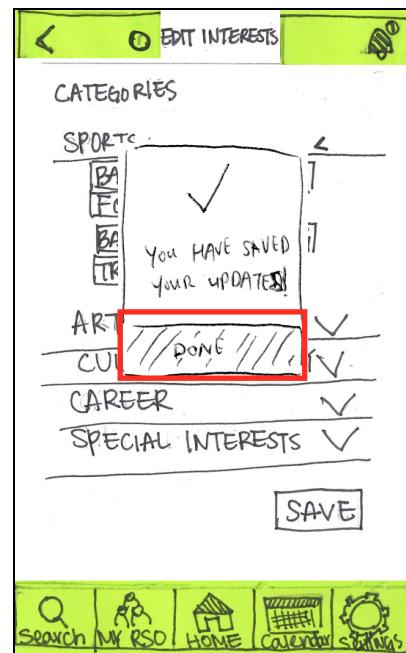

4. The user is taken to a page with drop-down menus where they are able to edit their interests. They click on *Basketball* and *Soccer* to add more Soccer and Basketball-related RSOs to their feeds.

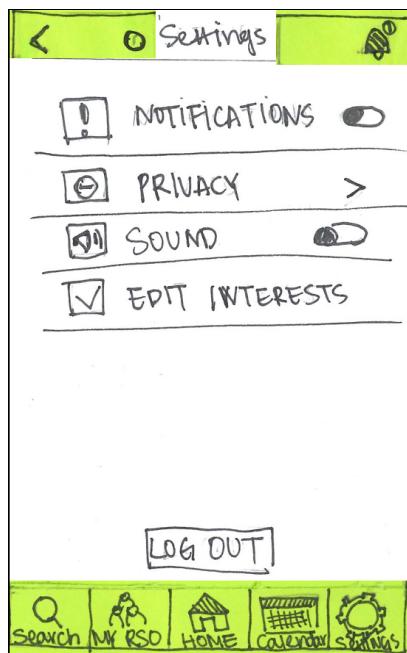

Additional Task: Editing Your Personal Interests (continued)

5. The user clicks Save to confirm their changes.

6. A pop-up shows up to confirm that the user's interests have changed.

6. User is automatically brought back to the settings screen after dismissing the pop-up.

Feedback Responses:

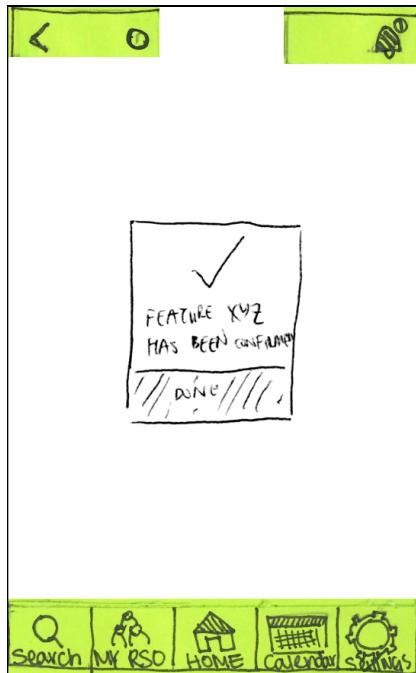

Feedback is provided to ensure to the user that an action has been completed.

Confirmation that an RSO has been added to your Circles.

Confirmation that some update has been saved.

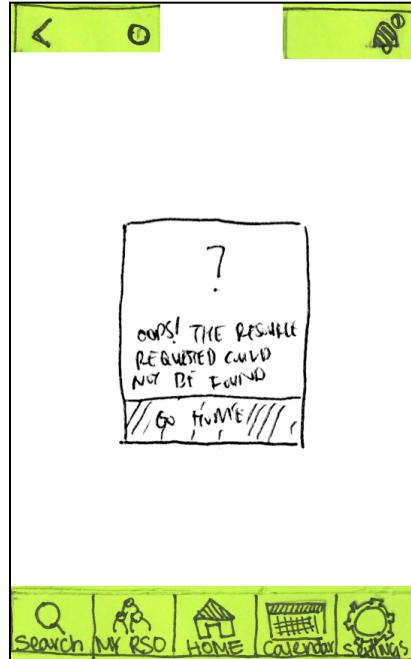

A generic confirmation screen.

Error/Failure State Responses:

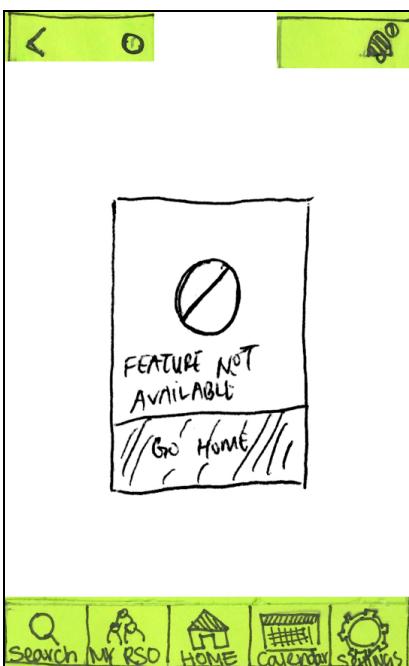

Error responses are provided when something goes wrong unexpectedly.

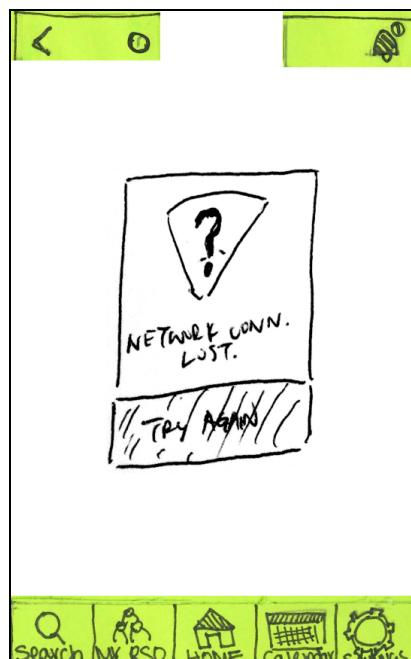

A “Try Again” feature if something goes wrong, like fails to load.

“Resource not found” message that points the user *Home*.

A “Feature Not Available” for broken links or missing parts of any module.

A “Network connection lost” feature for when network connections die out.
